

Local Capacity Development Results Framework

SpO: Increased Use of Senegalese or Local Systems
to implement activities

- % of program funds implemented through Senegalese or local financial management systems
- Dollar amount of program funds implemented through Senegalese or local financial management systems
- # of new program-funded awards made directly to Senegalese or local entities

IR 1: Capacity built and/or strengthened within Senegalese public institutions and organizations

- # of public entities receiving USAID-supported capacity development technical assistance
- % of partner public entities that improved their management review scores over time

IR 2: Capacity built and/or strengthened within Senegalese civil society and private sector

- % of prime Senegalese NGO implementing partners that improved their management review scores over time
- # of prime Senegalese implementers who were sub-awarded in the past
- # of direct grants given to local civil society organizations providing capacity building trainings

IR 3: USAID's internal mechanisms established to implement procurement reforms

- Existence of a functioning website
- Integration of LCD concerns in the New Activity Approval Mission Order
- Existence of purchase agreements tailored for LCD

CRITICAL ASSUMPTIONS:

1. USAID Continued/enhanced support to the implementation of the procurement reform
2. Bilateral political conditions enable empowerment of people
3. Fiduciary risk from use of partner country systems can be identified and mitigated appropriately per established procedures
